Buy In Bulk (BIB) Program

Eco-Building Products' Buy-in-Bulk Program

This program is designed with the intent of joining a group in an effort to achieve common goals. We partner with individual members of our community and our vendors to achieve these common objectives:

- Get the best price possible on quality sustainable products.
- Reduce our collective footprint on Mother Earth.
- Be a part of an effort that is bigger than just our own.
- Support and build a healthy and strong relationship with a thriving company.

Co-mingling individual orders into one bulk order helps our vendors, some of whom are manufacturing locally, to make it possible for Eco-Building Products and our Buy-in-Bulk participants to get the best price.

How it works:

Our Buy-in-Bulk Program (BiB) has a launch date, an order date and a pick up or shipment date.

- *Launch Date:* The date Eco-Building Products initiates the BiB marketing campaign for a particular product
- *Order Date:* The date that Eco-Building Products places its order with its vendor. All individual orders must be received with a 50% deposit on or before this date
- *Pick Up Date:* The date on which participants can pick up their individual orders. This typically is a couple days after the Bulk Order had been received at Eco-Building Products and have been sorted into its individual orders
- *Shipment Date:* This is the date that Eco-Building Products will ship out the individual orders to those who are unable to pick up their orders, typically they are our on-line customers who have elected to participate in the Buy-in-Bulk Program. Outgoing shipping will generally involve an additional fee.

Upcoming Promotions

Photovoltaic Solar Systems:

Launch Date: January 1st - *Order Date:* April 1st
